

VOLUME 1 FINAL REPORT

1980 CENSUS OF POPULATION AND HOUSING

ZAMBOANGA DEL NORTE

REPUBLIC OF THE PHILIPPINES

NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

NATIONAL CENSUS AND STATISTICS OFFICE

MANILA

REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

HIS EXCELLENCY PRESIDENT FERDINAND E. MARCOS

Chairman

Honorable VICENTE B. VALDEPEÑAS, JR.

Minister of Economic Planning and Director-General of the Authority

NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES

Executive Director & Civil Registrar-General

MARCELO M. ORENSE Assistant Executive Director

14/54

FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

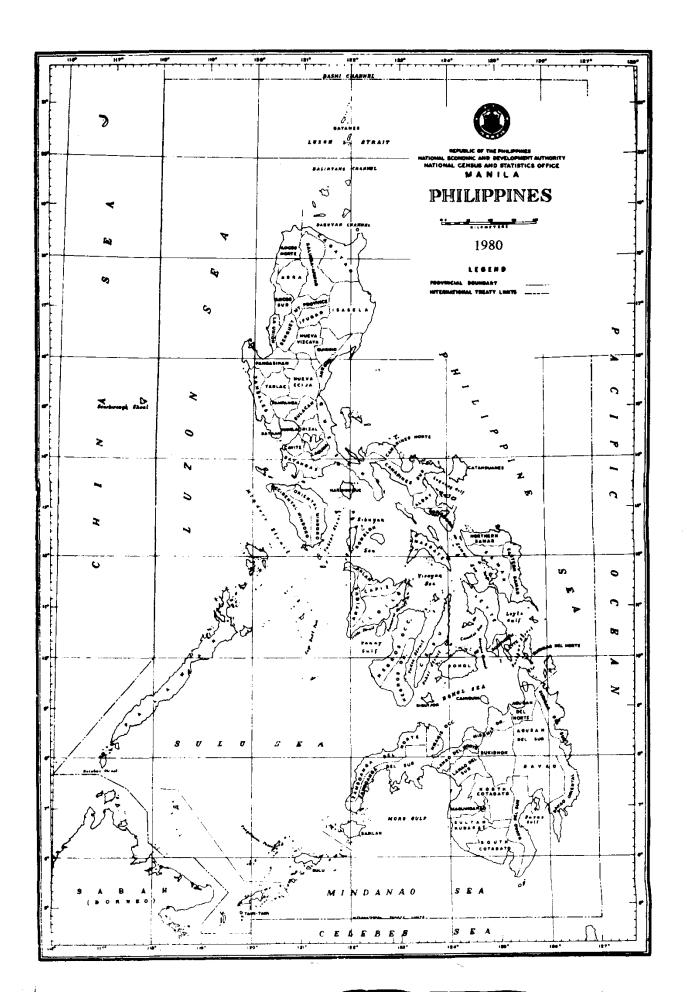

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every censal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age Sex Marital Status	Type of Building Type of Occupancy Construction Materials of Roof and Outer Walls
Highest Grade Completed Literacy Language/Dialect Spoken in the Household Gainful and Non-Gainful Occupation Major and Minor Industry Migration	Year Built Floor Area of Dwelling Unit Tenure of Owner-Occupant with Respect to the Land Kind of Lighting Facilities Use and Source of Water Supply Type of Toilet Facilities Kind of Cooking Fuel Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I - POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
 (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II - HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial — a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial — a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

- 6. Other housing unit (natural shelter, boat, etc.)
 - This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.
- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

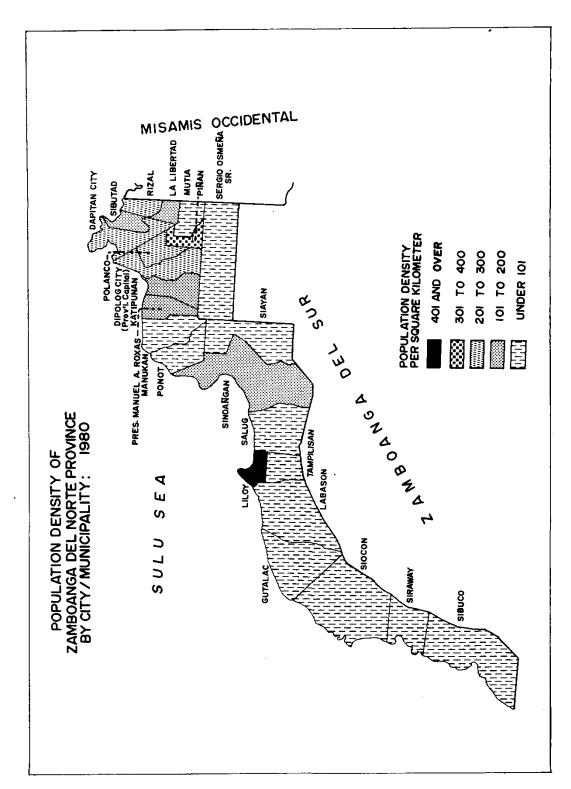

NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

Zamboanga del Norte: A Brief Analysis

The province of Zamboanga del Norte lies on the northwestern rim of the Zamboanga peninsula, its boundaries defined by the Sulu Sea on the north and on the west, Zamboanga del Sur on the south, and Misamis Occidental on the east. While some of its coastal areas are rough, some consist of broad fertile plains situated mainly in the central and northern sections of the province. Generally, however, the provincial terrain is elevated and mountainous, particularly in the southern part and in the northern portion forming the boundary with Zamboanga del Sur. Zamboanga del Norte and Zamboanga del Sur are bounded by high mountain ranges from the north to the south. Its highest peak is Mt. Dabiak with an elevation of 2,568.1 meters. The province is endowed with many big rivers and creeks. It has an irregular coastline extending from north to south which covers a distance of 400 kilometers and facing the Sulu Sea.

Two cities and 21 municipalities comprise the province with Dipolog City as the capital.

POPULATION

As recorded in the May 1, 1980 census, Zamboanga del Norte had 588,015 inhabitants of which 299,178 were males and 288,837 were females. In terms of population size, the province ranked number 26 among the 73 provinces of the country. Its annual geometric growth rate of 3.69 percent showed a negligible increase over the 3.68 percent growth rate in the May 1, 1975 census.

The second largest among the five provinces comprising Region IX, Zamboanga del Norte has a total land area of 6,618.1 square kilometers. Its population density moved up from 74.1 in 1975 to 88.8 in 1980, an increase of 14.7 persons per square kilometer within a five-year period.

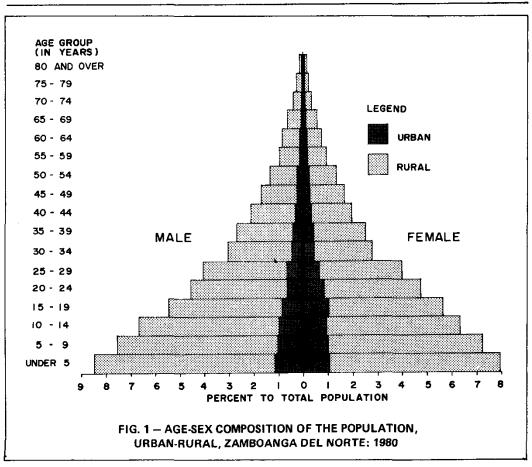

Both urban and rural population proportions are characterized by increases and decreases over the last three censal years. Urban residents posted 14.51 percent of the total population in 1970, down to 14.30 percent in 1975 but upped to 15.43 percent in 1980. On the other hand, rural dwellers accounted for 85.49 percent of the 1970 population, rose to 85.70 percent in 1975 but moved down to 84.57 percent in 1980. Overall, the figures indicate that Zamboanga del Norte is still predominantly rural.

A comparative breakdown of the population classified according to urban-rural residence and sex is shown in Table A.

A BRIEF ANALYSIS

TABLE A – URBAN-RURAL POPULATION BY SEX,
ZAMBOANGA DEL NORTE: 1970, 1975 AND 1980

Area Classification and Sex	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	588,015	100.00	<u>490,515</u>	100.00	409,379	100.00
Male Female	299,178 288,837	50.88 49.12	252,155 238,360	51.41 48.59	205,289 204,090	50.15 49.85
Urban	90,732	15.43	70,132	14.30	59,416	14.51
Male Female	44,555 46,177	7.58 7.85	35,102 35,030	7.16 7.14	28,373 31,043	6.93 7.58
Rural	497,283	84.57	420,383	85.70	349,963	85.49
Male Female	254,623 242,660	43.30 41.27	217,053 203,330	44.25 41.45	176,916 173,047	43.22 42.27

The sex ratio (number of males per 100 females) of the population decreased from 105.79 in 1975 to 103.58 in 1980, the males still outnumbering the females. The sex ratio was higher in the rural (104.93) than in the urban areas where there were only 96.49 males for every 100 females.

The population pyramid for the rural male and female population tends to follow an expansive profile of the age-sex distribution. A large number of the rural male and female population are under 5 years of age. From this age group through the 80 years old and above, both sexes lessen as each age group becomes older. Urban male population follows the same pattern while their female counterparts exhibit a disagreement to the pyramid-like configuration as those 15-19 years of age exceed those belonging to the 5-9 and 10-14 year-old age groups.

AGE COMPOSITION

Zamboanga del Norte still has a high proportion of the younger age group (0-14 years) at 44.19 percent although a decrease of 2.57 percentage points from the 1975 proportion is noted. Considered as the productive age group, the 15-64 age bracket increased by 2.14 percentage points from 50.95 percent in 1975, after rising by 1.48 percentage points from the 1970 level. The older age group (65 years old and over) constitutes a small proportion of the provincial population (2.72%), manifesting a very slight increase of 0.43 percentage point within the five-year period.

Below are comparative figures showing the age composition of the population in three censal years:

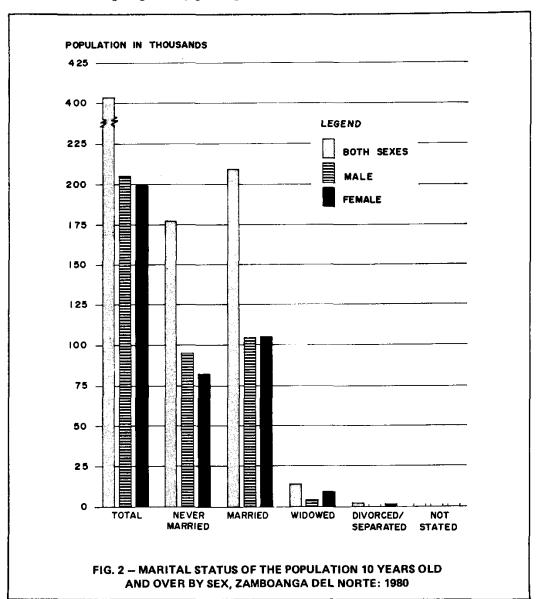

TABLE B -- AGE COMPOSITION OF THE POPULATION, ZAMBOANGA DEL NORTE: 1970, 1975 AND 1980

Age	198	30	19	75	19'	70
Composition	Number	Percent	Number	Percent	Number	Percent
Total	588,015	100.00	490,515	100.00	409,379	100.00
0 – 14 years 15 – 64 years 65 years and over	259,868 312,172 15,975	44.19 53.09 2.72	229,389 249,899 11,227	46.76 50.95 2.29	198,300 202,513 8,566	48.44 49.47 2.09

With an increased percentage of persons in the productive ages, the dependency ratio was much lower in 1980 than it was a decade ago. The dependency ratio dropped from 102.15 in 1970 to 96.29 in 1975 and whittled down to 88.36 in 1980. The preceding table on age distribution shows that 46.91 percent of the population belong to the "dependent" population. Surprisingly, more dependents are found among males than among females. For every 100 males 15-64 years of age, 89.95 are dependent compared to 86.74 dependents for every 100 females in the same age group.

The urban dependency ratio is markedly lower than the rural ratio, 77.24 for the former and 90.55 for the latter. Of the total urban population, 40.23 percent are below 15 years old, 56.42 percent are in the productive age bracket and only 3.35 percent, 65 years old and over. Comparatively, 44.92 percent of the rural residents are 0-14 years of age; 52.48 percent, 15-64 and 2.60 percent, 65 and over.

The median age of the population is 17 years; half of the population are below 17 years old and the other half, above this age. An increase in the median age of the population every five years is noted -15 in 1970, 16 in 1975 and 17 in 1980, indicating that the population of Zamboanga is gradually growing older (Table 3).

MARITAL STATUS

Suddenly declining by 4.33 percentage points since 1975, never married persons trailed behind married persons who now comprised 51.90 percent of the population 10 years old and over. Slight increases were noted in the proportions of widowed, divorced/separated and not stated categories (0.89, 0.20 and 0.03 percentage points, respectively).

More than half (52.78%) of the rural populace were married compared to 47.32 percent of the urban dwellers. Never married persons constituted 43.11 percent of the rural population while their urban counterparts made up 48.30 percent.

Of the male population 10 years old and over, 46.35 percent were never married, 4.52 percentage points lower than the 1975 level. In contrast, the proportion of married males went up from 47.14 percent to 50.97 percent. Likewise, the proportion of widowed males rose slightly by 0.51 percentage point while the divorced or separated reportedly gained 0.14 percentage point. Among the females, 41.50 percent were never married, following a 4.06 percentage-point decrease. Married females, on the other hand, upped from 50.33 percent to 52.84 percent. Similarly, the proportions of widowed and divorced/separated females increased by 1.28 and 0.25 percentage points, respectively (Table 4).

The succeeding table shows the classification of the population ten years old and over by sex and marital status:

TABLE C - POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, ZAMBOANGA DEL NORTE: 1975 AND 1980

Sex and	19	80	1975		
Marital Status	Number	Percent	Number	Percent

HIGHEST GRADE COMPLETED

Persons with elementary education maintained a marked preponderance over those in the other categories, but dropped from 62.98 percent in 1975 to 60.54 percent of the private household population 7 years old and over. On the other hand, the proportions of those who reached the secondary and college levels increased by 3.77 and 1.88 percentage points, respectively. The proportion of academic degree holders likewise rose by 0.52 percentage point. It is interesting to note that the proportion of persons who had no formal schooling went down from 17.90 percent in 1975 to 16.13 percent in 1980.

Of those who had elementary training only, 30.80 percent graduated from sixth or seventh grade. Over one-third (37.96%) did not go beyond the first to third grade; 17.95 percent attained the fourth grade and 13.29 percent, the fifth grade. Among those with secondary education, 72.28 percent reached anywhere from the first to third year while 27.72 percent graduated from fourth year. Majority of the college undergraduates (82.14%) finished the lower collegiate years (first to third year) and only 17.86 percent completed the fourth or higher year.

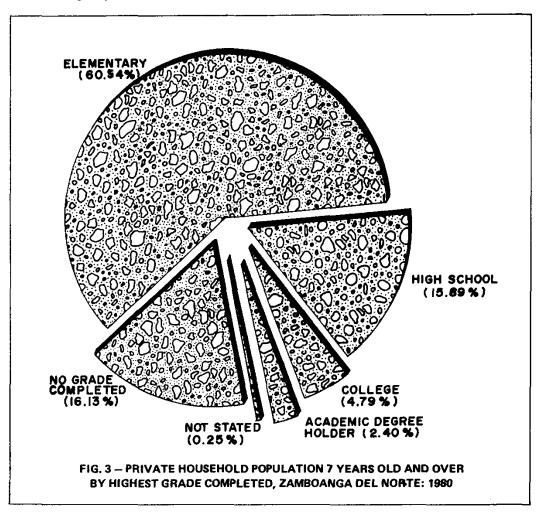

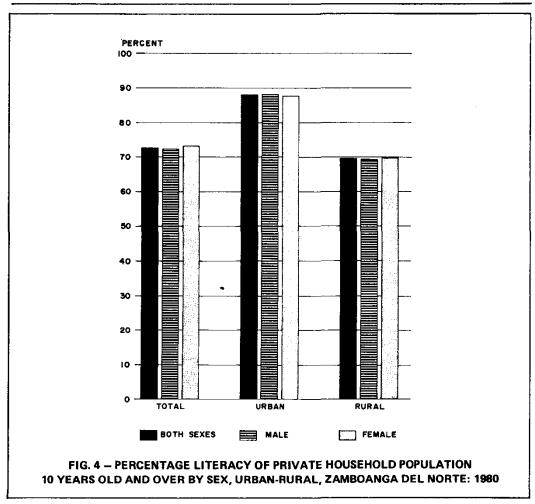

TABLE D — PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, ZAMBOANGA DEL NORTE: 1975 AND 1980

GAINFUL OCCUPATION

Gainful workers comprise 49.09 percent of the private household population 15 years old and over. Slightly more than half or 50.91 percent of the private household population in this age bracket are in non-gainful activities.

The number of gainful workers has increased to 160,746 from the 1975 report of 134,053. Table E shows that agricultural, animal husbandry and forestry workers, fishermen and hunters consistently form the biggest group of gainful workers although its proportion dropped from 79.24 percent in 1975 to 76.48 percent in 1980. Production and related workers, transport equipment operators and laborers, likewise, rose by 1.40 percentage points from their 1975 level of 6.33 percent. The proportion of professional, technical and related workers, now third in rank, went up by 1.15 percentage points, followed by the service workers (4.77%), sales workers (2.97%) and clerical and related workers (1.86%). Administrative, executive and managerial workers, as in the past, make up the least proportion (0.18%) of gainful workers. Workers not classifiable by occupation account for 0.99 percent (Table 8).

TABLE E — GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, ZAMBOANGA DEL NORTE:

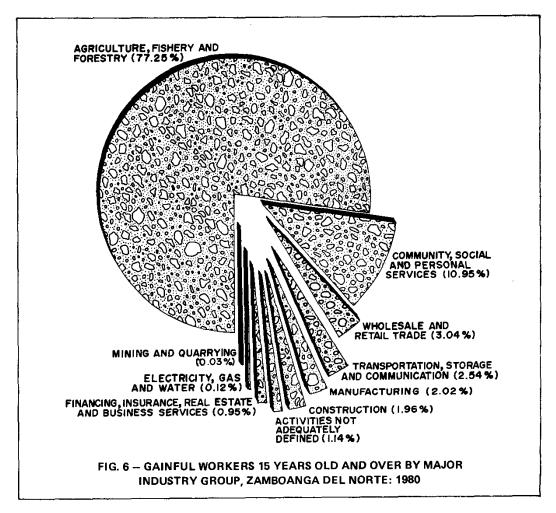

1975 AND 1980

Major Occupation	19	80_	19	75
Group	Number	Percent	Number	Percent

and laborers	12,421	7.73	8,483	6.33
Workers not classifiable				
by occupation	1,596	0.99	1,367	1.02

INDUSTRY

Agriculture, fishery and forestry, the dominant industry group in Zamboanga del Norte, provide means of livelihood to 77.25 percent of the total gainful workers 15 years

old and over. Majority of the agricultural workers derive their income from agricultural crop production (89:09%) and 9.68 percent, from fishery. Community, social and personal services, the second largest industry group, employs 10.95 percent of the total gainful workers whose main concentrations are in personal and household services (36.78%), education services (34.16%), and public administration and defense (18.17%). Wholesale and retail trade rank third with 3.04 percent, followed by workers in transportation, storage and communication (2.54%), manufacturing (2.02%) and construction (1.96%). Financing, insurance, real estate and business services contribute barely one percent (0.95%); electricity, gas and water, 0.12 percent; mining and quarrying, 0.03 percent and activities not adequately defined, 1.14 percent (Table 9).

MIGRATION

Out of 490,639 private household persons 5 years old and over, 94.89 percent were residents of the same city or municipality where they had lived on May 1, 1975. Of the 25,078 persons or 5.11 percent who changed residence, 3.06 percent moved to another

municipality within the province while 1.94 percent moved across provincial boundaries. Only a small percentage were residing in foreign countries (0.11%). In each migratory movement, there were more males involved than females except for the intra-provincial migrants where males and females had equal proportions (1.53%). For both sexes in the three migratory movements, a big majority established their new residence in the rural areas (Table 10).

TYPE OF BUILDING

Table 1 shows that single houses are being occupied by almost all (97.43%) of the 101,393 households of Zamboanga del Norte. Some live in duplex (1.28%), apartment/accesoria/condominium/row house (0.23%) and improvised structures such as barong-barong (0.86%). A negligible 0.13 percent reside in commercial/industrial/agricultural buildings. Ten households are occupying institutional buildings such as hospital, convent, school dormitory and other collective living quarters like a military camp.

Most households in both urban (91.50%) and rural (98.50%) areas dwell in single houses. Households living in duplexes, apartments/accesorias/condominiums/row houses, and commercial/industrial/agricultural structures are mostly concentrated in the urban areas while households residing in single houses, improvised and other types of buildings are in the rural areas.

Table F gives an insight of the housing conditions in Zamboanga del Norte in two censal years:

TABLE F - NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, ZAMBOANGA DEL NORTE: 1970 AND 1980

Type of Building	198	30	19	1970	
Type of Bunding	Number	Percent	Number	Percent	
Total	101,393	100.00	68,698	100.00

Institutional (hospital, convent,					
school dormitory, etc.)	5	0.01	1	0.00	
Other collective living quarters					
(military camp, etc.)	5	0.01	-	_	

TYPE OF OCCUPANCY

A great majority (88.99%) of the households own the dwelling units they occupy. The rest are tenants/lessees (6.22%); subtenants/sublessees (0.27%) and rent-free occupants (4.52%). (See Table 1.)

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

A large majority (83.16%) of the households live in dwelling units roofed with cogon or nipa and 15.51 percent in units constructed with roofs of galvanized iron or aluminum. The rest dwell in units with roofs of tile/concrete/brick/stone and asbestos (0.39%) and of makeshift/salvaged and other materials (0.94%). In both urban and rural areas, bigger proportions of households reside in units built with roofs of cogon or nipa (64.42% and 86.56%, respectively) than galvanized iron or aluminum (33.97% and 12.16%, respectively).

As to construction materials of outer walls, 47.86 percent of the households occupy dwelling units with walls of bamboo or sawali and 37.28 percent, of wood or plywood. This also holds true for households in the rural areas where 52.30 percent reside in dwelling units walled with bamboo or sawali and 35.18 percent, of wood or plywood. On the other hand, a higher proportion of the urban households (48.82%) live in dwelling units with walls built of wood or plywood and 23.43 percent, of bamboo or sawali. The rest of the households in Zamboanga del Norte dwell in units built with outer walls of galvanized iron/aluminum, tile, concrete, brick or stone, mixed tile/concrete/brick/stone and wood/plywood and asbestos (6.83%) and of cogon or nipa, makeshift or salvaged and other materials such as anahaw (8.03%). (See Table 2.)

YEAR BUILT

As shown in Table 2, more than half or 57.94 percent of the total households are occupants of dwelling units built in 1976-1980; 22.45 percent during 1971-1975; 13.17 percent, 1961-1970; 4.82 percent, 1951-1960 and 1.04 percent, 1942-1950. A mere 0.58 percent live in buildings constructed before World War II (1941 or earlier).

FLOOR AREA OF DWELLING UNIT

More than half of the households (57.28%) live in dwelling units with floor area of less than 30 square meters. Less than one-third (30.92%) reside in 30-49 square-meter dwelling units; 6.20 percent dwell in units 50-69 square meters; 2.83 percent, 70-99 square meters and 1.44 percent, 100-149 square meters. Only 1.33 percent have spacious dwelling units from 150 square meters and over (Table 3).

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 90,225 households occupying their dwelling units as owners, 63.39 percent also own the land where the structure is built. The rest are lessees or sublessees (10.67%) and farm lessees/agricultural tenants of landowner (13.53%). Owner-occupants with other legal tenure of the land constitute 3.76 percent and those with no tenure (squatter, etc.), 8.65 percent (Table 4).

KIND OF LIGHTING FACILITIES

As seen in Table 5, more than four-fifths (88.20%) of the total households in Zamboanga del Norte illuminate their dwelling units by means of kerosene. Users of electricity make up 6.24 percent of the households; liquefied petroleum gas (LPG), 4.39 percent; oil and others such as candle or wax, 1.17 percent. More rural (91.64%) than urban (69.26%) households are using kerosene while the reverse is true for users of electricity (urban – 29.68%, rural – 1.98%).

SOURCE AND USE OF WATER SUPPLY

For drinking water, households rely mostly on dug well (37.31%) and spring (33.18%). The others get their drinking water from tubed/piped deep well (12.32%), faucet, community water system (8.08%), tubed/piped shallow well (6.79%), lake, river, stream, irrigation, etc. (2.15%) and rain (0.17%).

The proportions of households using water from the same sources for kitchen purposes slightly vary from those utilizing them for drinking. Almost two-fifths or 39.17 percent rely on dug well; 31.68 percent, spring; 11.34 percent, tubed/piped deep well; 6.62 percent, tubed/piped shallow well; 5.91 percent, faucet, community water system; lake, river, stream, irrigation, etc., 5.09 percent and rain, 0.19 percent.

For washing clothes, the prime sources are lake, river, stream, irrigation, etc. (32.92%), dug well (26.14%) and spring (21.75%). Less than one-tenth (9.27%) utilize tubed/piped deep well; 5.11 percent, tubed/piped shallow well; 4.40 percent, faucet, community water system; and only 0.41 percent, rain (Table 6).

COOKING FUEL

Wood or charcoal is still the most common kind of cooking fuel in the province with 88.67 percent of the total households using it. The rest cook with kerosene (8.01%); liquefied petroleum gas or LPG (1.28%); electricity (0.20%) and other kinds (1.84%). In both urban and rural areas, the predominant use of wood or charcoal is observed (87.74% — urban, 88.83% — rural). However, the proportion of households using kerosene is higher in rural (8.35%) than in urban areas (6.14%). On the other hand, 4.12 percent of the urban households use liquefied petroleum gas and 0.87 percent, electricity as compared to 0.76 percent and 0.09 percent, respectively, of the rural households (Table 8).

TOILET FACILITIES

Water-sealed with depository other than sewer/septic tank is the most popular type of toilet facility in the province with 45.17 percent of the total households using it. About 14.27 percent use water-sealed with sewer/septic tank; 11.25 percent use the closed pit (antipolo, etc.); 9.48 percent, open pit and 2.61 percent, other types such as pail system, etc. Around 17.22 percent of the households have no toilet at all.

Urban households have better toilet facilities than their rural partners. Over four-fifths or 83.43 percent of the urban households use water-sealed toilets compared to 55.08 percent of the rural households. Likewise, only 6.84 percent urban households have no toilet facilities compared to 19.10 percent of their rural counterparts (Table 7).

xxxiii

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

More than half (54.88%) of the total households in Zamboanga del Norte own radios; only 1.01 percent have television sets and 2.71 percent have refrigerators or freezers. Urban households have higher proportions in the ownership of the three appliances. Of the 15,601 urban households, 69.63 percent have radios; 4.27 percent own television sets and 10.80 percent, refrigerators or freezers. Among rural households, 52.20 percent own radios; 0.42 percent, television sets and 1.24 percent, refrigerators or freezers (Table 9).
